Aspiring and diligent software developer with a high level of work integrity, time management skills, and a strong user focus seeking software engineering internship. Proven success designing and optimizing web-based applications, android applications including developing and coding for school-based projects using various languages.

PROJECTS

Portfolio Website – Web Development

- The portfolio website was built with a dynamic react JS library including react three fiber to create some amazing animations and react router to navigate through different pages.
- Technologies used: HTML | CSS | SASS | JAVASCRIPT | REACT | REACT-THREE-FIBER | REACT-SCRIPTS | REACT-MDL | BOOTSTRAP

NYC Payroll – Data Analysis and Machine Learning

- The NYC Payroll dataset is a public dataset available over public interest and concern on how New York City allocates and spends its budget. Certain methodologies were used such as K-nearest neighbor and ANOVA.
- Technologies used: PYTHON | JUPYTER | PANDAS | MATPLOTLIB | SEABORN | SCIKIT-LEARN | NUMPY

EXPERIENCE

ZamZam Drugs Pharmacy

Bronx, NY

Pharmacy Technician

June 2018 - present

- Consistent for efficient handling of customer service duties (e.g., answering phones, typing prescriptions, patient processing) that allowed Pharmacists and pharmacy staff to focus on the health concerns of their patients.
- Worked under the supervision of the pharmacist to deliver quality customer service.

Razzaks Computers Inc.

Toronto, ON

Associate Manager/Sales

December 2016- February 2017

- Set up, tested and configured hardware and software related issues of desktops, laptops, and cell phones. Configured desktops with motherboards, processors, RAMs and video graphic cards.
- Shared product knowledge with customers while making personal recommendations.
- Routinely inspect company property and equipment, creating repair tickets as needed to ensure a comfortable and safe space for employees and guests.
